REQUEST FOR PROPOSALS

Service-Continuity Upgrade for Legacy Meidensha Medium-Voltage Vacuum Circuit Breakers

RFP # 1065054

Addendum #1

JAMAICA PUBLIC SERVICE CO. LTD.

We are facing constraints on the electricity grid/network; as such, we will be unable to facilitate the site visit schedule for today, as the plant will be required to be taken offline. The site visit is being rescheduled to June 17, 2026. Kindly provide your intention to visit the site, as the name(s) need to be logged 2 days before the visit commences.

3. General Instructions to Bidders

3.7 Site Visit

Vendors shall attend a site visit at Rockfort Diesel Power Station as part of the RFP process. The purpose of the visit is to support a comprehensive, technically defensible response grounded in actual field conditions rather than assumptions drawn solely from legacy drawings, photographs, or partial records.

The site visit shall enable vendors to assess, at minimum:

- existing switchgear geometry and access constraints;
- breaker removal and replacement paths;
- bus bar arrangement and interface limitations;
- available space constraints affecting breaker replacement work in generator breaker and auxiliary transformer cells;
- lifting, rigging, staging, and work-front constraints associated with the barge-mounted plant; and
- the extent of any as-found deviation from legacy documentation.

Three-dimensional (3D) laser scanning or an equivalent spatial-capture method is strongly preferred, covering the affected switchgear cells, breaker compartments, bus compartments, retained CT interfaces, and auxiliary transformer breaker locations.

The vendor shall submit:

- site visit observations summary, including identified constraints, assumptions, and required clarifications;
- as-found dimensional report;
- as-built reconciliation methodology;
- 3D model or equivalent field-capture output;
- interference review;
- final installation drawings; and
- fabrication release hold points pending JPS review.

JAMAICA PUBLIC SERVICE CO. LTD.

Because the installed equipment is legacy brownfield infrastructure, all vendors shall include a field-verification plan sufficient to reconcile original drawings, historical modifications, and present as-found conditions.

Contractor attending the Site visit should be properly equip with their fire-retardant PPE and Safety gear.

6. Submission of Bids and Selection Criteria

All responses must be in English Language Your bid response must be presented in two (2) separate Files Folders, namely Financial/Costing and Technical Specifications. The deadline for submission of bids is **Eastern Standard Time 11:59pm on Thursday July 16, 2026.**

RFP CALENDAR
